

5.1 – 5.3 The Internet and its uses

ANSWERS

Question	Answer	Marks
6	<p>The diagram includes (any four from):</p> <ul style="list-style-type: none"> – Traffic passing both ways through the firewall – An indication that criteria is set for the firewall – Traffic is compared to criteria – Traffic being rejected if it does/does not meet criteria – Traffic being accepted if it does/does not meet criteria <p>e.g.</p>	4

Question	Answer	Marks
1(a)	– A	1
1(b)	<p>Any one from:</p> <ul style="list-style-type: none"> – Spyware // Keylogger – Adware – Trojan horse 	1
1(c)	– Anti-malware	1

5.1 – 5.3 The Internet and its uses
ANSWERS

Question	Answer	Marks
8(a)	<p>The diagram demonstrates (One mark for each part of the diagram):</p> <ul style="list-style-type: none"> – Data is being sent from one device to another – The data is being examined during transmission – Packet sniffer is used – Intercepted data is reported to a third-party during transmission ... – ... and analysed for anything useful – Connection hacked to spoof destination address <p>e.g.</p>  <pre> graph LR A[Comp A] --> S[Packet sniffer] S --> B[Comp B] S --> T[Third party] T --> U[Analyses data for anything useful] </pre> <p style="text-align: center;">Packet sniffer examines data as it is sent from one computer to another</p> <p style="text-align: center;">Analyses data for anything useful</p>	4
8(b)	<ul style="list-style-type: none"> – Encryption ... – ... if the data is intercepted it will be meaningless (because they do not have the decryption key) 	2

5.1 – 5.3 The Internet and its uses
ANSWERS

Question	Answer		Marks
9	Term	Description	6
	world wide web	the collective name for all the web pages available	
	cookie	a small text file, stored by the web browser, that can store a user's personal data	
	uniform resource locator (URL)	the text-based address for a website // It is made up of the protocol, domain name and filename/folder name	
	web server	Stores web pages // receives requests from clients and returns requested web page	
	hypertext markup language // HTML	the language used to create a website. Example tags are <head> and <body>	
	hypertext transfer protocol // HTTP	a protocol that is used to request and send web pages	

Question	Answer	Marks
12(a)	Any two from: – <u>Only</u> exists electronically – Can be a decentralised system – Can be a centralised system – Usually encrypted	2
12(b)	– Blockchain	1

Question	Answer	Marks
4(a)	Any two from: – Display web pages – ... by rendering HTML	2
4(b)	– Storing cookies	1
4(c)	Any one from: – Storing bookmarks – Storing favourites	1
4(d)	Any one from: – It encrypts it – Uses digital certificates	1

5.1 – 5.3 The Internet and its uses

ANSWERS

Question	Answer	Marks
8(a)	Three from: <ul style="list-style-type: none"> • Trial and error to guess a password • Combinations are repeatedly entered ... • ... until correct password is found • Can be carried out manually or automatically by software 	3
8(b)(i)	Any two from: e.g. <ul style="list-style-type: none"> • Steal/view/access data • Delete data • Change data • Lock account // Encrypt data • Damage reputation of a business 	2

Question	Answer	Marks
8(b)(ii)	Any three from: e.g. <ul style="list-style-type: none"> • Virus • Worm • Trojan horse • Spyware • Adware • Ransomware 	3
8(c)	Any two from: <ul style="list-style-type: none"> • Two-step verification//Two-factor authentication//by example • Biometrics • Firewall // Proxy-server • Strong/complex password // by example • Setting a limit for login attempts • Drop-down boxes • Request for partial entry of password 	2

Question	Answer	Marks
10(a)	<ul style="list-style-type: none"> • To obtain personal data/details // by example 	1
10(b)	<p>One mark for each correct part of the diagram. Diagram shows:</p> <ul style="list-style-type: none"> • User clicks/opens attachment/link that triggers download • Malicious software downloaded onto user's computer • User enters website address • User is redirected to fake website <p>e.g.</p> <pre> graph LR A[User clicks link that downloads malware to computer] --> B[User computer malware] C[User types in web address] --> D[Real website] D -.-> E[Fake website] B -- "Request gets redirected" --> E </pre>	4

5.1 – 5.3 The Internet and its uses

ANSWERS

Question	Answer	Marks
10(c)	Two from: Displays web pages ... by rendering HTML	2
10(d)	Any three from: e.g. <ul style="list-style-type: none"> Storing bookmarks/favourites Recording user history Allowing use of multiple tabs Providing navigation tools // by example Providing an address bar Managing protocols // by example // checking digital certificate Send URL to DNS Sends a request to the IP address/web server (to obtain the contents of a webpage) Runs active script/JavaScript/client-side script Allows files to be downloaded from website/internet 	3
10(e)	Any four from: <ul style="list-style-type: none"> Session cookies are stored in memory/RAM ... whereas persistent cookies are stored on the hard drive/secondary storage When the browser is closed a session cookie is lost ... whereas a persistent cookie is not lost ... until deleted by the user/they expire 	4

Question	Answer	Marks
6(a)	One mark for each correct term. <ul style="list-style-type: none"> Text Web browser // web server Web server // web browser Session Session Persistent 	6
6(b)	Any three from: e.g. <ul style="list-style-type: none"> Saving personal details Storing login details Tracking user preferences Holding items in an online shopping cart 	3

Question	Answer	Marks
7(a)	<p>One mark for each part of the diagram (MAX six). The diagram demonstrates:</p> <ul style="list-style-type: none"> Malware downloaded to several computers ... turning it into a bot/zombie ... creating a network of bots/zombies Third party/hacker initiating the attack Bots send requests to a web server at the same time The web server fails due to the requests Legitimate requests cannot reach the web server 	6

5.1 – 5.3 The Internet and its uses

ANSWERS

Question	Answer	Marks
7(b)	Any two from: e.g. <ul style="list-style-type: none"> • Revenge • To affect a company's reputation • Entertainment value • To demand a ransom to stop it • To test a system's resilience 	2
7(c)	Any two from: <ul style="list-style-type: none"> • Proxy server • Firewall • Users scanning their computers with anti-malware 	2

Question	Answer	Marks
6(a)	Any three from: e.g. <ul style="list-style-type: none"> • Checking the spelling and tone of the email/website • Checking the URL attached to a link • Scanning a download with anti-malware • Only downloading data / software from trusted sources • Never providing personal details online • Install a firewall to check if the website is valid 	3

Question	Answer	Marks
6(b)	Two marks for description, one mark for example: <ul style="list-style-type: none"> • Manipulating / deceiving / tricking people ... • ... to obtain data // to force them to make an error • Any suitable example of social engineering 	3
6(c)	Any three from: <ul style="list-style-type: none"> • Providing users with different permission for the data • Limiting access to reading data limiting the data that can be viewed • Limiting access to editing data // limiting the data that can be deleted / changed • Normally linked to a username 	3

Question	Answer	Marks
8	One mark for each correct term in the correct order: <ul style="list-style-type: none"> • Malware • Bot • Botnet • Web server • Website 	5

5.1 – 5.3 The Internet and its uses
ANSWERS

Question	Answer	Marks
1(a)	D	1
1(b)	<p>One mark for identification. E.g. One mark per bullet for description to max two each.</p> <p>Virus</p> <ul style="list-style-type: none"> • Software/code that replicates • ...when the user runs it // with an active host • Deletes/damages/corrupts data/files // takes up storage/memory space <p>Worm</p> <ul style="list-style-type: none"> • Software/code that replicates itself on a network • ...without user input // without active host • Takes-up bandwidth • Deletes/damages/corrupts data/files // takes up storage/memory space • Opens back doors to computers over the network • Used to deposit other malware on networked computers <p>Trojan horse</p> <ul style="list-style-type: none"> • Software/code that is hidden within other software // Software that is disguised as authentic software • ...when downloaded/installed the other malware/by example it contains is installed <p>Adware</p> <ul style="list-style-type: none"> • Software/code that generates/displays (unwanted) adverts on a user's computer • Some may contain spyware/other malware • Some when clicked may link to viruses • Reduces device performance // reduces internet speed • Redirects internet searches/user to fake websites <p>Ransomware</p> <ul style="list-style-type: none"> • Software/code that stops a user accessing/using their computer/data • ...by encrypting the data/files/computer • A fee has to be paid to decrypt the data // A fee has to be paid to 'release' the computer/device/data 	6

5.1 – 5.3 The Internet and its uses
ANSWERS

Question	Answer	Marks
1(c)	<p>One mark for each similarity to max two. One mark for difference (both sides needed unless clearly and accurately implied).</p> <p>Similarities e.g.</p> <ul style="list-style-type: none">• Check incoming and outgoing signals // filter traffic• Store whitelist/blacklist• Block incoming/outgoing signals• Both block unauthorised access• Keep a log of traffic• Both can be hardware or software (or both) <p>Differences e.g.</p> <ul style="list-style-type: none">• Proxy can hide user's IP address, firewall does not hide the user's IP address• Proxy intention is to divert attack from server, firewall is to stop unauthorised access• Proxy protects a server, firewall protects individual computer• Proxy examines/processes requests for a website but a firewall does not (checks type of signal) // Proxy processes client-side requests whereas firewall filters packets• Proxy transmits website data to the user, but a firewall does not (it allows valid signals)• Proxy allows faster access to a web page using cache, but a firewall does not (allow faster access or have cache)• Proxy can hide internal network from internet, but a firewall cannot	3

5.1 – 5.3 The Internet and its uses
ANSWERS

Question	Answer	Marks
5(d)(i)	<p>Any two from:</p> <p>e.g.</p> <ul style="list-style-type: none"> • Storing bookmarks/favourites • Storing history • Allow multiple tabs/web pages to be open • Allow movement back and forth between web pages // provides navigation tools • Allows the user to enter a URL/IP into the address bar • Manages HTTP/HTTPS protocol • Search cache for IP // Request IP from DNS // Send URL to DNS • Sends a request to the IP address/web server (to obtain the contents of a web page) • Runs active script/JavaScript/client-side script • Allows files to be downloaded from website/internet 	2
5(d)(ii)	<p>Any two from:</p> <p>e.g.</p> <ul style="list-style-type: none"> • Storing preferences // so the user does not have to select their preferences each time they visit the site • Storing account details // so the user does not have to remember/enter their username and password each time they visit the site • Storing recent purchases // to allow the user to quickly re-order more items • Storing the pages visited/items selected // to display relevant adverts • Storing shopping basket // so when the user leaves the site the items are still in their basket 	2

Question	Answer	Marks
4(a)	<p>One mark for identification of the method (max 2), two marks for describing how the method could be used</p> <ul style="list-style-type: none"> • Phishing • A legitimate looking email is sent to her, asking her to click a link • ... this takes her to a fake website where she enters her bank details • Pharming • She accidentally downloads malicious software onto her computer • ... this redirects her legitimate website requests to a fake website where she enters her bank details • Hacking • A person gains unauthorised access to her computer • ... they steal/view a data file that contains her bank details • Spyware • Records the key presses on her computer • ... this data is analysed for patterns and her bank details are identified 	6
4(b)(i)	<ul style="list-style-type: none"> • The data will be meaningless if it is stolen 	1
4(b)(ii)	<p>One from:</p> <ul style="list-style-type: none"> • Data is encrypted and decrypted using the same key/algorithm <p>Any three from:</p> <ul style="list-style-type: none"> • Data before encryption is known as plain text • Data after encryption is known as cypher text • Key is sent to receiver (to allow data to be decrypted) // Values are sent to receiver that are used to generate key 	4

5.1 – 5.3 The Internet and its uses

ANSWERS

Question	Answer	Marks
4(b)(iii)	<p>Any three from:</p> <ul style="list-style-type: none"> • Firewall // proxy server • Password • Biometric device • Virtual measure e.g. onscreen keyboard • Two-step verification // two factor authentication • Physical methods • Antimalware // Antispyware // Antivirus 	3

Question	Answer	Marks
8(a)(i)	<p>Any two from e.g.:</p> <ul style="list-style-type: none"> • Background colour • Font colour • Font size • Font style 	2
8(a)(ii)	<p>Any two from e.g.:</p> <ul style="list-style-type: none"> • Placement of text • Placement of image 	2
8(b)	<p>Any five from:</p> <ul style="list-style-type: none"> • Web browser sends request to web server • ... to view the digital certificate • Web server sends the digital certificate to the web browser • Web browser checks the certificate for authenticity • If certificate is authentic a secure connection is created • Any data sent is encrypted • If certificate is not authentic the connection is rejected • Uses a protocol such as SSL/TLS 	5

Question	Answer	Marks
8(c)	<p>Any two from:</p> <ul style="list-style-type: none"> • A (small) text files • ... that is stored by the browser • ... sent between web server and browser when user visits the website <p>Any two from e.g.:</p> <ul style="list-style-type: none"> • To track users browsing habits • To store personal details • To tailor web page to user's presentation requirements • To store items in a virtual shopping cart • To tailor adverts to a user 	4
8(d)	<p>One from:</p> <ul style="list-style-type: none"> • Proxy server <p>Any three from:</p> <ul style="list-style-type: none"> • It examines the incoming traffic to server • It limits the number of requests to the website • ... preventing too many requests that could overwhelm the server • Block multiple requests from the same IP within a timeframe 	4

5.1 – 5.3 The Internet and its uses

ANSWERS

Question	Answer	Marks
6(a)	Any two from: <ul style="list-style-type: none"> • Check if web address starts with HTTPS • Check if there is a locked padlock • Check the digital certificate for the website 	2
6(b)	<ul style="list-style-type: none"> • Transport layer security // TLS 	1
6(c)	Any four from: <ul style="list-style-type: none"> • To act as intermediary between browser and web server • to filter/examine/monitor traffic to the web server • to help stop malicious traffic to the web server • To cache frequently viewed web pages • to allow faster response time for requests • to reduce the number of requests the server needs to process • To help prevent DoS • stopping the webserver being overloaded with requests • by redirecting away from server // by stopping DoS attack reaching server • To act as a firewall 	4
6(d)(i)	<ul style="list-style-type: none"> • Spyware 	1

Question	Answer	Marks
6(d)(ii)	One mark for a correct method, one mark for a corresponding description <ul style="list-style-type: none"> • Drop down boxes • this means that the keypresses cannot be recorded • Onscreen/virtual keyboard • this means that the keypresses cannot be recorded • Biometrics // by example • this means that the keypresses cannot be recorded • no password entered to be gathered • Anti-malware // anti-spyware • this will scan for/remove any malware that could be recording keypresses • Random/select values requested from password • this means that full password cannot be obtained (in a single login) • Firewall • to prevent the download of any malware that could gather keypresses 	6
6(e)	One mark for each correct term in the correct order <ul style="list-style-type: none"> • URL • IP address • Web server • Web pages • HTML • Browser 	6

Question	Answer	Marks
10(a)(i)	Any three from: <ul style="list-style-type: none"> • It is a secure protocol // hypertext transfer protocol secure • It is a set of rules for data transmission • It combines HTTP and SSL/TLS to transmit data • It encrypts data for transmission 	3
10(a)(ii)	Any one from: <ul style="list-style-type: none"> • Look for a locked padlock • Check the digital certificate 	1
10(b)	Any three from: <ul style="list-style-type: none"> • Hacking • Virus • Malware <p>Note: If three different types of correct malware are given, they can be awarded.</p>	3

5.1 – 5.3 The Internet and its uses
ANSWERS

Question	Answer	Marks																								
9(a)	<p>One mark for each correct row:</p> <table><thead><tr><th>Statement</th><th>Browser (✓)</th><th>IP address (✓)</th><th>URL (✓)</th></tr></thead><tbody><tr><td>it contains the domain name</td><td></td><td></td><td>✓</td></tr><tr><td>it is a type of software</td><td>✓</td><td></td><td></td></tr><tr><td>it converts Hypertext Markup Language (HTML) to display web pages</td><td>✓</td><td></td><td></td></tr><tr><td>it is a type of address</td><td></td><td>✓</td><td>✓</td></tr><tr><td>it stores cookies</td><td>✓</td><td></td><td></td></tr></tbody></table>	Statement	Browser (✓)	IP address (✓)	URL (✓)	it contains the domain name			✓	it is a type of software	✓			it converts Hypertext Markup Language (HTML) to display web pages	✓			it is a type of address		✓	✓	it stores cookies	✓			5
Statement	Browser (✓)	IP address (✓)	URL (✓)

it is a type of software	✓																									
it converts Hypertext Markup Language (HTML) to display web pages	✓																									
it is a type of address		✓	✓																							
it stores cookies	✓																									

Question	Answer	Marks												
3(a)	<p>One mark for the correct term or definition</p> <table><tr><th>Term</th><th>Definition</th></tr><tr><td>browser</td><td>Software/application that allows users to view web pages / render HTML</td></tr><tr><td>Internet Service provider // ISP</td><td>this is the company that provides a user with a connection to the Internet</td></tr><tr><td>HTTP // HTTPS</td><td>this is a protocol that is used to send data for web pages across the Internet</td></tr><tr><td>Uniform Resource Locator (URL)</td><td>a text-based version of a web address</td></tr><tr><td>cookie</td><td>a text file (stored by web browser) that contains data about a user's browsing habits/details/preferences</td></tr></table>	Term	Definition	browser	Software/application that allows users to view web pages / render HTML	Internet Service provider // ISP	this is the company that provides a user with a connection to the Internet	HTTP // HTTPS	this is a protocol that is used to send data for web pages across the Internet	Uniform Resource Locator (URL)	a text-based version of a web address	cookie	a text file (stored by web browser) that contains data about a user's browsing habits/details/preferences	5
Term	Definition													
browser	Software/application that allows users to view web pages / render HTML													
Internet Service provider // ISP	this is the company that provides a user with a connection to the Internet													
HTTP // HTTPS	this is a protocol that is used to send data for web pages across the Internet													
Uniform Resource Locator (URL)	a text-based version of a web address													
cookie	a text file (stored by web browser) that contains data about a user's browsing habits/details/preferences													
3(b)	<ul style="list-style-type: none">• Hardware or software based	1												
3(c)	<p>Four from:</p> <ul style="list-style-type: none">• (The parent can) set criteria for the websites she is allowed to visit• ... such as a whitelist/blacklist of websites• The firewall will examine the data/traffic incoming and outgoing from her computer• If data is sent from a website that is not allowed, it will be blocked	4												

Question	Answer	Marks
6(a)	<p>One mark for identifying the attack, two marks for the description</p> <ul style="list-style-type: none"> Phishing Email is sent to user to encourage them to click link ... that takes user to fake website <p>Pharming</p> <ul style="list-style-type: none"> Email is sent to user to encourage them to click link/download attachment ... that triggers download of malicious code that will redirect user to fake website <p>Virus/malware</p> <ul style="list-style-type: none"> Email is sent to user to encourage them to click link/download attachment ... that triggers download of virus/malware <p>Denial of service // DoS</p> <ul style="list-style-type: none"> A very large number of emails are sent to a server/network at the same time ... crashing the server/network 	6

5.1 – 5.3 The Internet and its uses
ANSWERS

Question	Answer	Marks												
11	One mark per each correct term. <table><tr><th>Terms</th><th>Description</th></tr><tr><td>HTML</td><td>the language used to create a web page</td></tr><tr><td>Browser</td><td>the type of software application used to display a web page</td></tr><tr><td>IP address</td><td>an address given to a computer, by a network, to allow the computer to be uniquely identified</td></tr><tr><td>Cookie</td><td>a text file sent by a web server to collect data about a user's browsing habits</td></tr><tr><td>Internet Service Provider // ISP</td><td>the company that provides a connection to the Internet</td></tr></table>	Terms	Description	HTML	the language used to create a web page	Browser	the type of software application used to display a web page	IP address	an address given to a computer, by a network, to allow the computer to be uniquely identified	Cookie	a text file sent by a web server to collect data about a user's browsing habits	Internet Service Provider // ISP	the company that provides a connection to the Internet	5
Terms	Description													
HTML	the language used to create a web page													
Browser	the type of software application used to display a web page													
IP address	an address given to a computer, by a network, to allow the computer to be uniquely identified													
Cookie	a text file sent by a web server to collect data about a user's browsing habits													
Internet Service Provider // ISP	the company that provides a connection to the Internet													

Question	Answer	Marks
10(a)	– To disrupt the operation of a web server/network	1
10(b)	– To obtain a user's personal data	1
10(c)	<p>Any three from:</p> <ul style="list-style-type: none"> – Hacking // Cracking – Virus – Spyware – Malware 	3

5.1 – 5.3 The Internet and its uses
ANSWERS

Question	Answer	Marks
3(a)	One mark per each correct term in the correct order. <ul style="list-style-type: none">– Software– Network– Criteria– Accept // reject– Reject // accept– Hacking	6

Question	Answer	Marks
4(a)	<ul style="list-style-type: none">– Legitimate looking/fake email sent to user– ... that contains a link to a fake website– User clicks link and enters personal details (into fake website)	3
4(b)	Any two from: <ul style="list-style-type: none">– Pharming– Spyware– Hacking/cracking	2
